PROFILE

Senior Computer Engineering student at Antalya Bilim University. I build software for real-life problems I see around me: QR-based order tracking for a tailoring shop and a booking system for a Pilates studio. During my internships I worked on enterprise applications, process automation (RPA, SAP) and AI-supported quality management.

EXPERIENCE

Talya Bilişim · Elektraweb · Intern · Quality Management and Software — October 2026 – Present

- Team member on Talya QMS-AI, a TÜBİTAK 1501-funded project that uses AI to predict quality risks in hotels.
- Developing software additions and changes for Elektra QM's new document management system and testing its new screens.
- Wrote a user guide for Elektra QM and a competitor and market analysis report for Elektraweb.

ANKUTSAN A.Ş. · Intern · Process Development / Information Technology — July 2026 – September 2026

- Turned SAP product card parameters into a modular, dynamic form using JavaScript.
- Modeled multi-level customer approval workflows in Paperwork BPM.
- Matched production data with SAP ERP consumption records and prepared raw material deviation analyses.
- Tested an n8n fleet tracking integration end to end with live vehicle data.

AGT Ağaç Sanayi ve Ticaret A.Ş. · Intern · Enterprise Applications — July 2025 – August 2025

- Built a chatbot interface (eBAssist) for the eBA document management platform from scratch with HTML, CSS and JavaScript, and presented it to the team.

PROJECTS

Mustan Tailoring (Next.js, React, TypeScript, Tailwind CSS) — Three-language website and order tracking for a tailoring shop in the Netherlands: QR-code tracking instead of paper receipts and one-click WhatsApp notifications.

Dry Cleaning Order Tracking (Next.js, TypeScript, Supabase, PostgreSQL) — Per-garment order tracking for a dry cleaner in Antalya: a tag number for every garment, account-free QR link tracking for customers, and an append-only status history.

Studio Booking (React, Vite, Node.js, Express) — Mobile-first booking and make-up class system for Pilates studios; admin panel, membership and payment tracking, database-level protection against double booking, ~130 tests.

Personal Finance Tracker (JavaScript, Node.js, Express, SQL Server) — Income and expense tracker with JWT authentication; REST API, categories, monthly summary and spending chart.

RECAMPUS — Capstone project, project manager in a team of four: a second-hand, swap and give-away marketplace for students verified by university email. I prepared the report and roadmap.

EDUCATION

Antalya Bilim University · Computer Engineering — 2022 – Present

SKILLS

Programming: Java, Python, C, JavaScript, SQL · **Web:** HTML, CSS, React, Node.js, Express · **Databases:** SQL Server, T-SQL, PostgreSQL, Azure Data Studio · **Embedded Systems:** 8051, Embedded C, Keil uVision, Proteus · **Process & Automation:** RPA, n8n, Paperwork BPM, SAP, eBA, Draw.io, Agile / Scrum · **Tools:** Git, Docker, MS Excel, Canva · **AI:** Claude, ChatGPT, Google Gemini, AI Agents, Prompt Engineering · **Core Engineering:** OOP, Data Structures & Algorithms

CERTIFICATES (21 certificates)

IBM SkillsBuild (8): IBM AI Agents Bootcamp, Unleashing the Power of AI Agents, Foundations in Generative AI… · **BTK Akademi** (6): Versiyon Kontrolleri: Git ve GitHub, Çevik Proje Yönetimi, API ve API Testi… · **İş Bankası ProSchool · Toptalent.co** (3): Digital Banking, Data & AI Class, IT Class · **Anthropic Academy**: Claude 101 · **Kodluyoruz**: IBM AI Agents Bootcamp · **Kariyer.net** (2): Yapay Zeka Araçları ile Eğitim Tasarımı, Yapay Zekâ ile İç Eğitmenlik Süreçlerini Verimli Hale Getirmek

LANGUAGES

Turkish (Native) · English (B2) · German (A1)
